WORK EXPERIENCE

Personal Web Page

I developed a web page to show my projects using Html Css and Javascript mainly using flex-box to accommodate the elements.

Web Page for a Restaurant

I made a page for a restaurant, the one they had wasn't working that well on movile devices, I made a new one for them.

Web Page Noita

In this project, what I did was replicate a web page of the video game noita, all by eye only taking the images and logos of the original page,
At the end I added some changes.

Etch-a-sketch

I used mainly Javascript using the Dom manipulation for this project, it consists of a scalable grid in which it acquires color when hovering over it, it has different functionalities such as erasing, changing to RGB etc.

EDUCATION AND TRAINING

Universidad Politécnica de Sinaloa

Ingeniería en Animación y Efectos Visuales

Studioweb
